The screenshot shows a PostgreSQL database interface. On the left, a tree view shows the database structure, including a 'public' schema with a table named 'OtherDrinks'. The main area displays a SQL query in the 'Query Editor' and its results in the 'Data Output' tab.

Query Editor:

```
1 SELECT * FROM public."OtherDrinks"
2 ORDER BY id ASC
```

Data Output:

| id | name_cn | name_en                | type   | Subcategory | url                    |
|----|---------|------------------------|--------|-------------|------------------------|
